

BackupAssist 101

Introduction to BackupAssist

Presented by Linus Chang, Lead Developer of BackupAssist

Today's agenda

- **Part One:** Introduction to BackupAssist
- **Part Two:** Technology overview
- **Part Three:** Putting it all together

Now:

Part One: Introduction to BackupAssist

- What's different about BackupAssist?
- How does BackupAssist benefit you?
- How does it benefit your organisation?

Still to come:

Part Two: Technology overview

Part Three: Putting it all together

Part One: Introduction to BackupAssist

What's different about BackupAssist?

How does BackupAssist benefit you?

How does it benefit your organization?

A backup software solution with 3 major differences:

Difference #1

Specially designed for small to medium businesses, so that it's easy to use, set-up and manage.

Difference #2

Builds upon existing backup standards and technologies that never go out of date, so your data can always be easily accessed.

Difference #3

It provides many different types of data protection in one package, so you have everything you need in one place.

Part One: Introduction to BackupAssist

What's different about BackupAssist?

How does BackupAssist benefit you?

How does it benefit your organization?

Designed to be so easy that almost anyone can use it!

Part One: Introduction to BackupAssist

What's different about BackupAssist?

How does BackupAssist benefit you?

How does it benefit your organization?

It gives you all the features you need to make it easy.

- ❑ Wizards designed to minimize the number of steps and guide you through them.
- ❑ Media rotation strategies built-in for all storage devices.
- ❑ Reminder emails to reduce human error.
- ❑ Report emails.
- ❑ 24 hour technical support online or over the phone.

Part One: Introduction to BackupAssist

What's different about BackupAssist?

How does BackupAssist benefit you?

How does it benefit your organization?

Designed to make you the hero!

Part One: Introduction to BackupAssist

What's different about BackupAssist?

How does BackupAssist benefit you?

How does it benefit your organization?

Reliable.

- ❑ Easy restore operations and wizards.
- ❑ Perform full restore operations in minutes.
- ❑ Never lose more than half a day's work.
- ❑ Restore from 100 days ago (or as long as you choose).
- ❑ Restore individual emails and documents.
- ❑ Backup and restore remotely.
- ❑ Facilities to backup on site or off site.

Part One: Introduction to BackupAssist

What's different about BackupAssist?

How does BackupAssist benefit you?

How does it benefit your organization?

Price.

- ❑ It costs less than half the price of the “known” brands.
- ❑ Inexpensive upgrade program – product is always up-to-date.
- ❑ You only pay for what you need – no hidden extras.
- ❑ Free, unlimited technical support.

Part One: Introduction to BackupAssist

What's different about BackupAssist?

How does BackupAssist benefit you?

How does it benefit your organization?

Quality product.

- Utilizes the excellent technology already built-in to Windows software.
- Doesn't 'reinvent the wheel' – uses standard formats.
- Works hand-in-hand with Windows to simplify usage.
- Compensates for Windows 'operational' shortfalls.

Part One: Introduction to BackupAssist

What's different about BackupAssist?

How does BackupAssist benefit you?

How does it benefit your organization?

Restorability.

- Does not require you to store data in obscure proprietary formats.
- You can always retrieve your data using any Windows operating system.
- You never have to pay for support from the vendor.
- No special software required to retrieve data.
- Data will still be accessible years from now.

Part One: Introduction to BackupAssist

What's different about BackupAssist?

How does BackupAssist benefit you?

How does it benefit your organization?

BackupAssist provides many types of data protection in one easy to use product.

The Complete Backup Toolkit for SMB

- Centralized Monitoring
- Drive Imaging
- File Replication
- Internet Backup
- SQL and Exchange

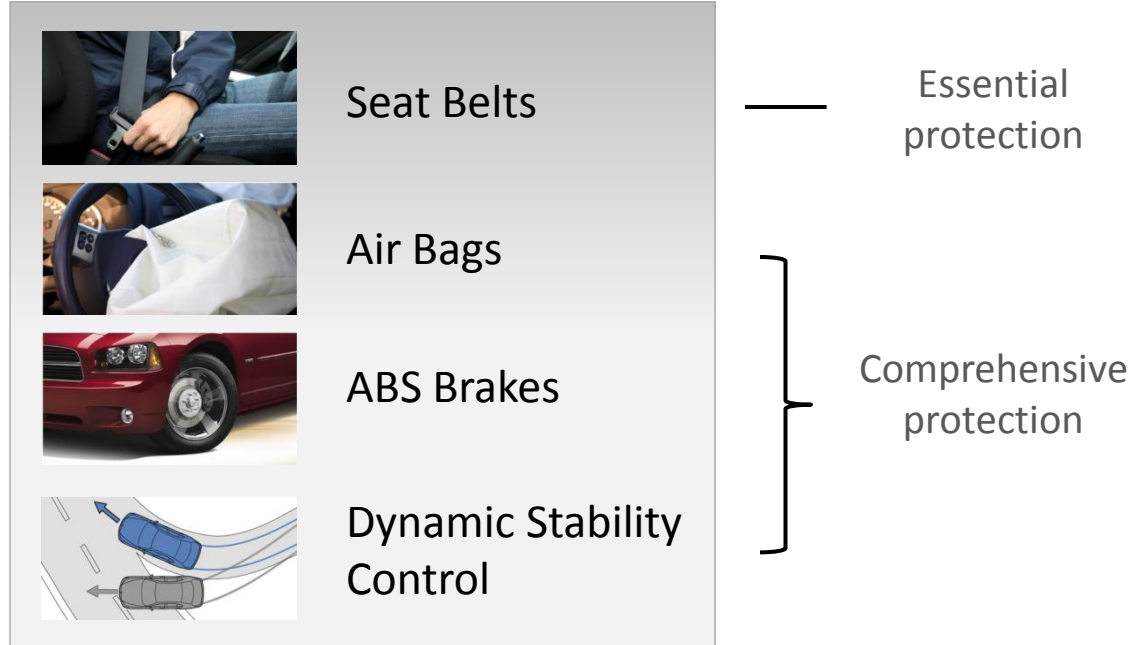

Part One: Introduction to BackupAssist

What's different about BackupAssist?

How does BackupAssist benefit you?

How does it benefit your organization?

Just like cars have multiple levels of safety features to protect you on the road...

Part One: Introduction to BackupAssist

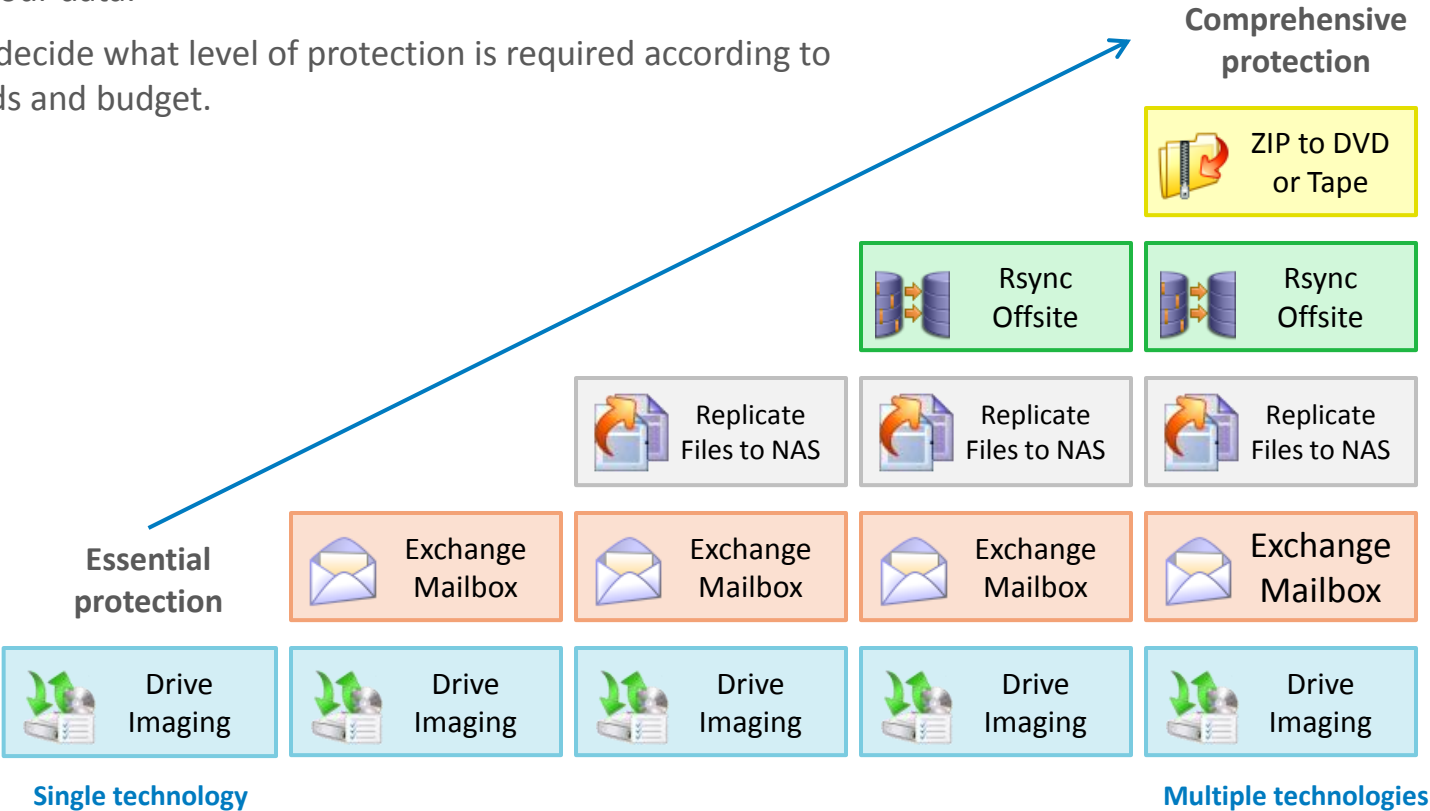

What's different about BackupAssist?

How does BackupAssist benefit you?

How does it benefit your organization?

...BackupAssist's multiple technologies act as different levels of safety for your data.

You decide what level of protection is required according to needs and budget.

Already covered:

Part One: Introduction to BackupAssist

Now:

Part Two: Technology overview

- Drive Imaging
- Exchange Mailbox
- File Replication
- ZIP64 Backup
- Rsync – Internet Backup
- SQL Server
- Hyper-V Backups

Still to come:

Part Three: Putting it all together

Part Two: Technology Overview

Drive Imaging

Exchange Mailbox

File Replication

Internet Backup

ZIP

SQL Server

Hyper-V

Drive Imaging – Server 2008 family.

- Image your entire server, or
- Image your System partition(s).

Key benefits of this technology:

1. Completely recover a server in under 30 minutes.
2. Restore to dissimilar hardware.
3. Restore individual files & apps.

Windows Server 2008
SBS 2008, EBS 2008,
or Hyper-V Server

For more information: http://www.backupassist.com/BackupAssist/tour_Imaging.html

Part Two: Technology Overview

Drive Imaging

Exchange Mailbox

File Replication

Internet Backup

ZIP

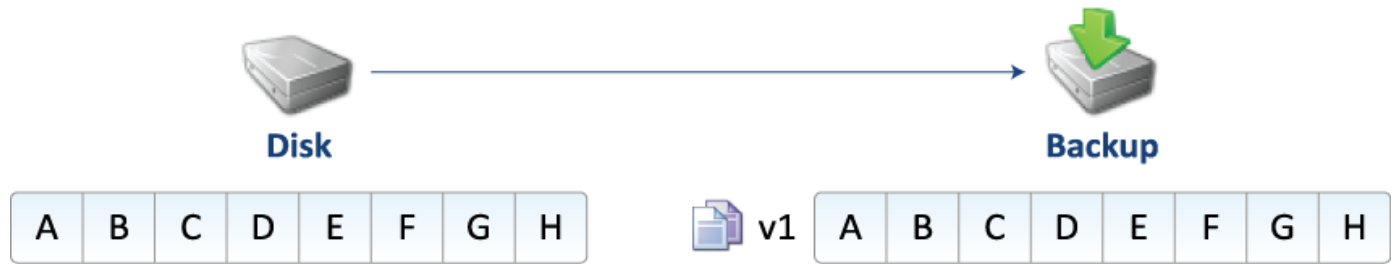

SQL Server

Hyper-V

How it works

Incremental backups save space.

First backup:

Monday's Backup

- No previous backups on this disk
- Full backup performed on Monday

Part Two: Technology Overview

Drive Imaging

Exchange Mailbox

File Replication

Internet Backup

ZIP

SQL Server

Hyper-V

Second backup (and so on):

Tuesday's Backup

- Blocks I and J are modified
- Blocks I and J are transferred to form the new full backup for Tuesday
- Blocks A and B are stored as Monday's version

Part Two: Technology Overview

Drive Imaging

Exchange Mailbox

File Replication

Internet Backup

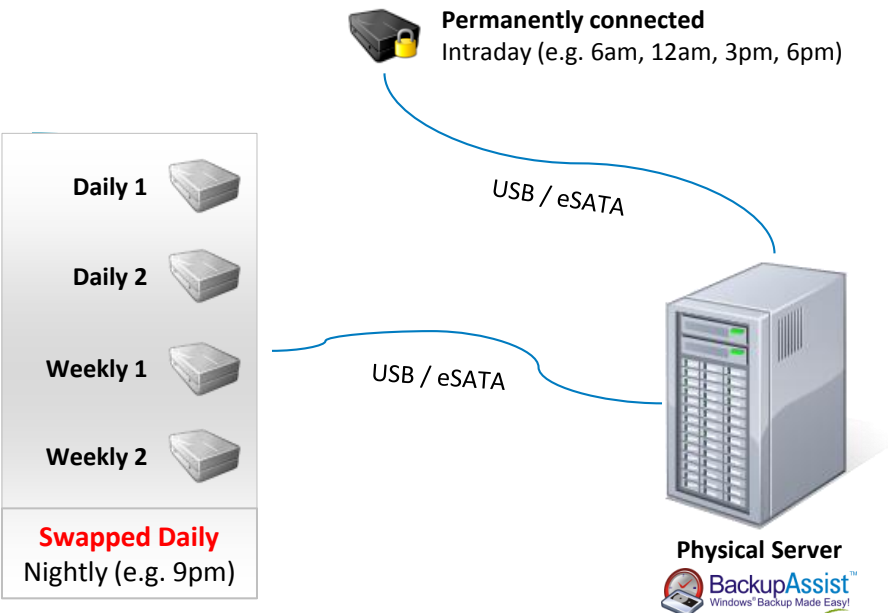

ZIP

SQL Server

Hyper-V

Example of Imaging setup.

Drive Imaging features included with BackupAssist license – USD \$249.

Price Indicator (USD)

Software:

- BackupAssist \$249

Hardware:

- 4x removable HDD \$120
- 1x external HDD \$120

Total: \$849

Part Two: Technology Overview

Drive Imaging

Exchange Mailbox

File Replication

Internet Backup

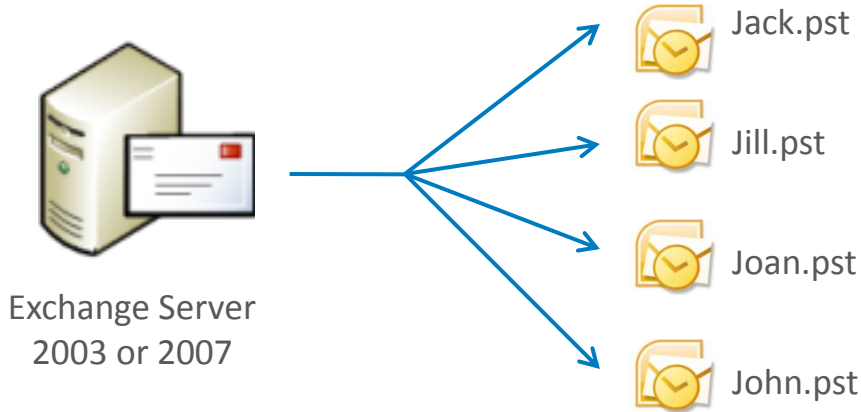

ZIP

SQL Server

Hyper-V

Exchange Mailbox Backups.

Taking user mailboxes to PST file:

Key benefits of this technology:

1. Recover specific mail, contact, calendar and note items easily.
2. Combine with Journaling to keep permanent email records.

For more information: http://www.backupassist.com/BackupAssist/tour_Exchange.html

Part Two: Technology Overview

Drive Imaging

Exchange Mailbox

File Replication

Internet Backup

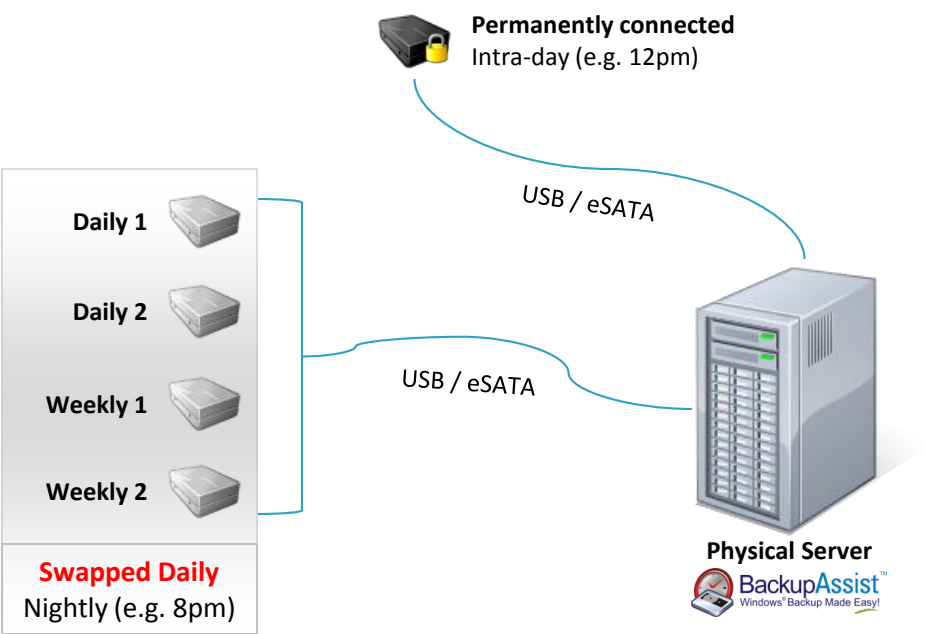

ZIP

SQL Server

Hyper-V

Example of Exchange Mailbox setup.

Exchange Mailbox features included with BackupAssist Exchange Mailbox Add-on – USD \$129.

Price Indicator (USD)

Software:

- BackupAssist \$249
- Exchange Mailbox \$129

Hardware:

- 4x removable HDD \$120
- 1x external HDD \$120

Total: \$978

Part Two: Technology Overview

Drive Imaging

Exchange Mailbox

File Replication

Internet Backup

ZIP

SQL Server

Hyper-V

File Replication

- Exact file copying from “A” to “B”
- VSS support

Key benefit of this technology:

1. Protect data on your file system, with massive amounts of backup history.

For more information: http://www.backupassist.com/BackupAssist/tour_FileReplication.html

Part Two: Technology Overview

Drive Imaging

Exchange Mailbox

File Replication

Internet Backup

ZIP

SQL Server

Hyper-V

Mode 2 – Backup with history

The result is a series of mirrors, one each time the backup is run. Each mirror is self-contained & the single instance store works totally transparently!

Part Two: Technology Overview

- Drive Imaging
- Exchange Mailbox

File Replication

- Internet Backup
- ZIP
- SQL Server
- Hyper-V

Example of File Replication setup.

File Replication features included with BackupAssist license – USD \$249.

Price Indicator (USD)

Software:

- BackupAssist \$249
- Exchange Mailbox \$129

Hardware:

- 4x removable HDD \$120
- 1x external HDD \$120
- 1x NAS / DAS \$300

Total (inc GST): \$ 1278

Part Two: Technology Overview

Drive Imaging

Exchange Mailbox

File Replication

Internet Backup

ZIP

SQL Server

Hyper-V

Rsync engine

BackupAssist helps you send Rsync files & folders across the Internet in a bandwidth efficient way.

Key benefit of this technology:

1. Automatic offsite protection for file and data.

For more information: http://www.backupassist.com/BackupAssist/tour_Rsync.html

Part Two: Technology Overview

Drive Imaging

Exchange Mailbox

File Replication

Internet Backup

ZIP

SQL Server

Hyper-V

Common challenges with Internet Backup:

Yet another piece
of software

*"More administrative overhead
and yet another vendor."*

Internet

Slow connection and
too much data

*"Will my data fit through the
pipe?"*

Potentially expensive hosting
fees & vendor lock-in

*"I want flexibility choosing
where to host my data."*

BackupAssist addresses all of these issues!

Part Two: Technology Overview

Drive Imaging

Exchange Mailbox

File Replication

Internet Backup

ZIP

SQL Server

Hyper-V

What is Rsync?

- The most widely deployed, most widely used, bandwidth efficient, original file-based remote synchronization tool.
- Gives you options on where to host your data.
- Can replicate application databases offsite:
 - SQL databases
 - Exchange Info Store
 - Mailbox PST files
 - Files & Folders.

Part Two: Technology Overview

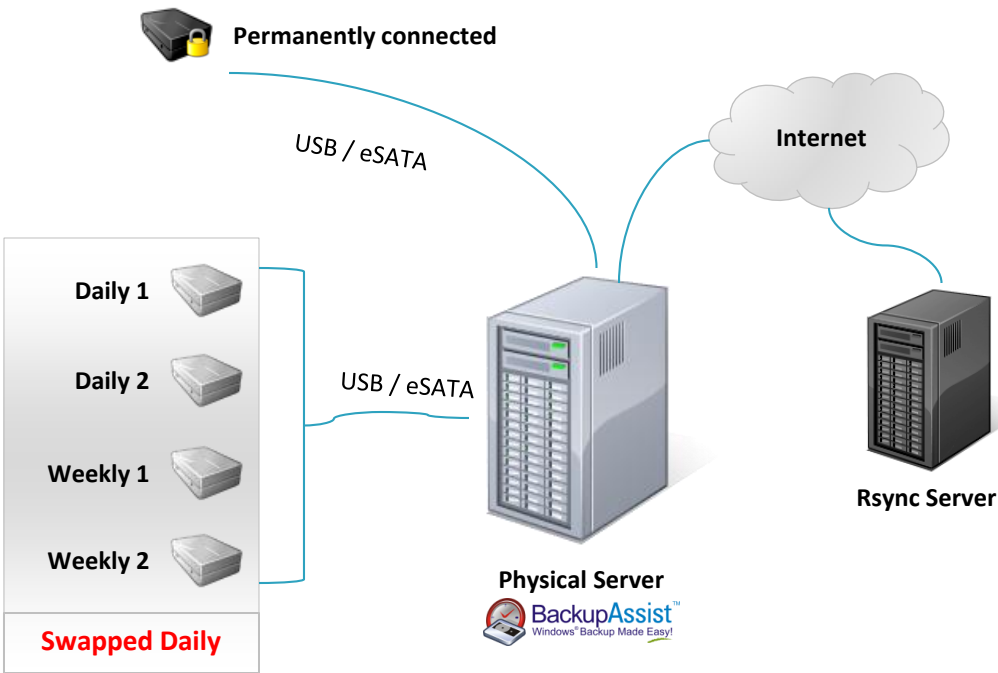

- Drive Imaging
- Exchange Mailbox
- File Replication

Internet Backup

- ZIP
- SQL Server
- Hyper-V

Example of Rsync Internet backup setup.

BackupAssist for Rsync licence – USD \$129.

Price Indicator (USD)

Software:

- BackupAssist \$249
- Exchange Mailbox \$129
- Rsync \$129

Hardware:

- 4x removable HDD \$120
- 1x external HDD \$120
- 1x Rsync Host \$560

Total (inc GST): \$1667

Part Two: Technology Overview

Drive Imaging

Exchange Mailbox

File Replication

Internet Backup

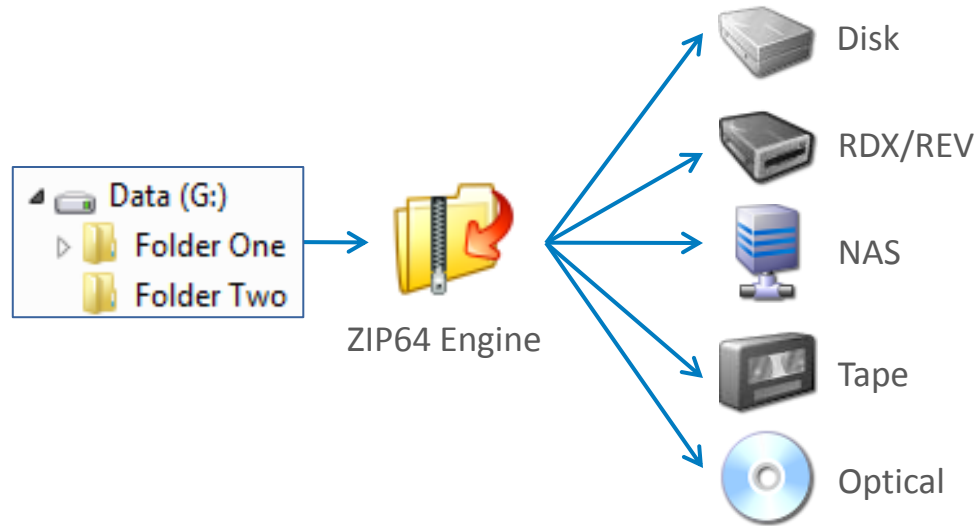

ZIP

SQL Server

Hyper-V

ZIP64 Backup Engine.

ZIP files and folders:

Key benefits of this technology:

1. Simple file protection using the proven ZIP file format.
2. Compression + AES-256 encryption.
3. Tape drive capable with add-on.

For more information: http://www.backupassist.com/BackupAssist/tour_Zip.html

Part Two: Technology Overview

Drive Imaging

Exchange Mailbox

File Replication

Internet Backup

ZIP

SQL Server

Hyper-V

Why ZIP64?

- ❑ The most widely deployed data storage format
- ❑ Compression and AES-256 encryption
- ❑ Ubiquitous restore
- ❑ ZIP & Burn your Exchange / SQL Databases
- ❑ ZIP to USB Flash Drive – daily data backup
- ❑ Burn files to disc on weekly basis.

Part Two: Technology Overview

Drive Imaging

Exchange Mailbox

File Replication

Internet Backup

ZIP

SQL Server

Hyper-V

Tape Drive Backups on Server 2008.

Zip-to-tape drive support for Server 2008:

- ☐ Maintain existing hardware investments
- ☐ Good supplementary backup to your daily drive imaging.

Part Two: Technology Overview

- Drive Imaging
- Exchange Mailbox
- File Replication
- Internet Backup

ZIP

- SQL Server
- Hyper-V

Example of Tape Drive backup setup on Server 2008

BackupAssist Zip-To-Tape Add-on – USD \$129.

\$ Price Indicator (USD)

Software:

- | | |
|--------------------|-------|
| • BackupAssist | \$249 |
| • Exchange Mailbox | \$129 |
| • Zip-to-Tape | \$129 |

Hardware:

- | | |
|-----------------------|-------|
| • 2x removable HDD | \$120 |
| • 1x external HDD | \$120 |
| • Existing tape drive | \$0 |

Total (inc GST): \$867

Part Two: Technology Overview

Drive Imaging

Exchange Mailbox

File Replication

Internet Backup

ZIP

SQL Server

Hyper-V

SQL Backup Engine

- ❑ Backup unlimited numbers of local or remote SQL servers
- ❑ Daily or near continuous protection
- ❑ Full daily backups
- ❑ 15 minute transaction log backups.

Key benefit of this technology:

1. Easy backup and recovery of SQL databases.

For more information: http://www.backupassist.com/BackupAssist/tour_SQL.html

Part Two: Technology Overview

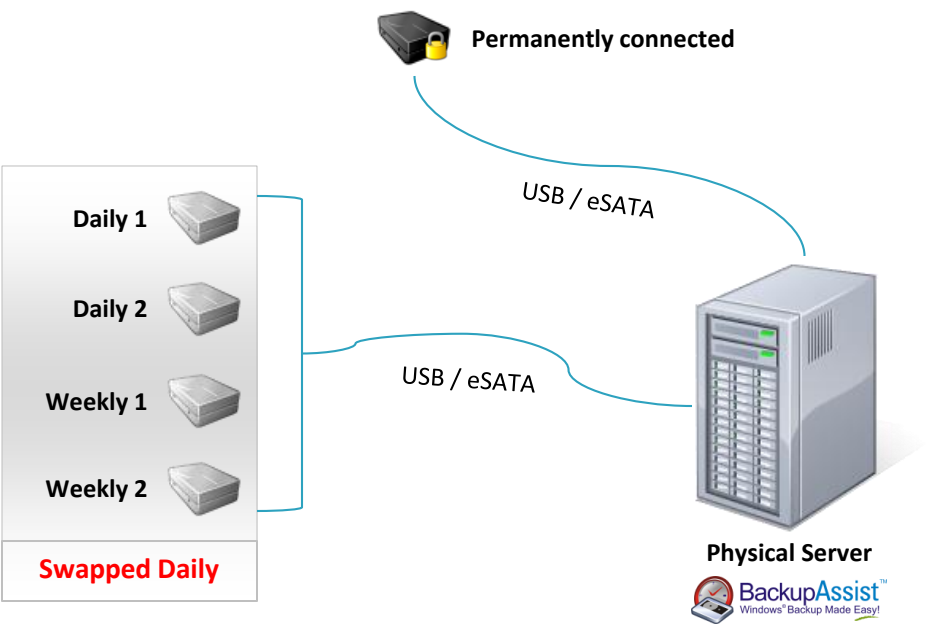

- Drive Imaging
- Exchange Mailbox
- File Replication
- Internet Backup
- ZIP

SQL Server

Hyper-V

Example of SQL Server backup setup.

BackupAssist SQL Add-on – USD \$195.

\$ Price Indicator (USD)

Software:	
• BackupAssist	\$249
• SQL	\$129

Hardware:	
• 4x removable HDD	\$120
• 1x external HDD	\$120

Total (inc GST): \$978

Part Two: Technology Overview

- Drive Imaging
- Exchange Mailbox
- File Replication
- Internet Backup
- ZIP
- SQL Server

Hyper-V

Hyper-V Backups.

- Straightforward and cost-effective option
- Image your host – a one-pass backup solution

Key benefits of this technology:

1. Protect your host and unlimited guests.
2. Restore at all levels: host, guest, file within guest, thanks to the BackupAssist Hyper-V Granular Restore Console.

BackupAssist		Competitor's Product	
BackupAssist	\$249	Competitor's product – for Windows Servers License + Essential 12 Months Support	\$1162.66
BackupAssist VM Granular Restore Add-on	\$249	Competitor's product – System Recovery Server Edition License + Essential 12 Months Support	\$1279.51
BackupAssist Exchange Mailbox Add-on	\$129	Competitor's product – Agent for Microsoft Virtual Server License + Essential 12 Months Support	\$2915.41
Total for BackupAssist Solution	\$627	Total for Competitor's Solution	\$5357.58

Part Two: Technology Overview

Drive Imaging

Exchange Mailbox

File Replication

Internet Backup

ZIP

SQL Server

Hyper-V

BackupAssist handles all recovery scenarios:

- ✓ Recover the entire server from bare metal
- ✓ Recover specific files and folders
- ✓ Restore all Hyper-V VMs to a different host
- ✓ Restore a single VM
- ✓ Restore a single VM to a different host
- ✓ Restore specific files & applications on a guest
- ✓ Recover a complete Exchange Server
- ✓ Recover individual Exchange mailboxes and Outlook items
- ✓ Recover SQL Server databases
- ✓ Onsite & offsite data protection

Part Two: Technology Overview

- Drive Imaging
- Exchange Mailbox
- File Replication
- Internet Backup
- ZIP
- SQL Server
- Hyper-V

Example of Hyper-V backup setup.

BackupAssist Hyper-V Granular Restore Add-on – USD \$249.

\$ Price Indicator (USD)

- Software:**
- BackupAssist \$249
 - Exchange Mailbox \$129
 - Hyper-V Granular \$249

- Hardware:**
- 4x removable HDD \$120
 - 1x external HDD \$120

Total (inc GST): \$1227

Now:

Part Three: Putting it all together

- Revenue opportunities
- Centralized Monitoring
- Product pricing
- Reseller programs

Part Three: Putting it all together

Revenue opportunities

Centralized Monitoring

Product pricing

Reseller programs

Revenue opportunities for I.T. Specialists

- ❑ Initial sale of hardware and software
- ❑ Ongoing sale of software upgrades (long term)
- ❑ Haas – place a NAS device into client's network; charge monthly fee
- ❑ Internet backup – use your own existing data centre, or buy a server & on-sell space to your client [buy in bulk, resell and mark up]
- ❑ Full service monitoring
- ❑ Data retrieval service/support.

Part Three: Putting it all together

Revenue opportunities

Centralized Monitoring

Product pricing

Reseller programs

Easy management and control:

- ☐ Unique Centralized Monitoring Console makes everything completely integrated.
- ☐ Hosted service.
- ☐ Web console – access reports, create client reports.
- ☐ Daily email – status of all monitored jobs in last 24 hours.
- ☐ Alerts you to problems as they arise.
- ☐ Monitor multiple clients in minutes.
